3. Now I'd like to ask you about some public figures and institutions. For each, please tell me whether you have a VERY favorable, SOMEWHAT favorable, somewhat UNFAVORABLE, or VERY unfavorable impression. If you have heard of the person or institution, but do not know enough to have an opinion, or if you have never heard of them, just say so, and we will move on.

[PROMPT EVERY THIRD NAME] Do you have a very favorable, somewhat favorable, somewhat unfavorable, or very unfavorable impression, or do you not know enough to have an opinion?

- a. SSA: [NOT JUST BILLIONAIRES/INEQUALITY]

Big banks and Wall Street billionaires have rigged the economy. All the gains go to those at the top while millions of families are still struggling to get back on their feet. Wall Street billionaires use loopholes to pay lower taxes than teachers, and hedge fund managers squeeze more and more profit out of companies while reducing benefits and eliminating jobs. We need to re-write the rules to make the economy work for working families, not just billionaires and big banks.—81 words

b. **SSB: [GRIEVANCES]**

Financial reform is about putting an end to the greed of the big Wall Street banks that cost people their jobs, their savings, and billions in taxpayer bailouts. Tough new laws will make sure that bank CEOs are kept accountable to the American people, and put an end to runaway executive pay. Taxpayers should not have to pay the price for Wall Street recklessness while those responsible continue to make outrageous profits. Laws should protect working Americans, not just billionaires. – 79 words

c. **SSA: [SAME TRICKS – AVOID ANOTHER CRASH]**

The big Wall Street banks that crashed our economy are bigger than ever, and they are up to the same risky bets that put the entire economy at risk. We need an economy that's healthy and stable. We can't let banks gamble with our money and risk another financial collapse. We need tough rules and strong penalties to make banks smaller, simpler, and safer. Bank failures can never be allowed to place our entire economy at risk - 77 words

d. **SSB: [EFFECTIVE MANAGEMENT – AVOID ANOTHER CRASH]**

Three of the four biggest banks are larger today than when we bailed them out in 2008. And the biggest financial firms have become too complex and involved in too much, increasing the likelihood these firms will get into trouble and once again put our economy at risk. We need to break up the banks that are too big to fail so they can't bring down the entire economy when something goes wrong – 72 words

e. _ [GET BACK TO CORE BUSINESS]

A healthy economy needs a healthy financial system. But today Wall Street and the big banks have become more focused on complicated wheeling and dealing that increases bank profits instead of making loans that allow businesses to create jobs and families to buy homes. We need to reform our financial system to make it work for main street and ordinary families. Banks should be focused on making sustainable loans to businesses and families, not just financial speculation- 77 words

f. _ [POWER AND INFLUENCE]

Too many politicians in both parties are beholden to Wall Street. The big banks and hedge fund managers spend millions on lobbyists and millions more on political contributions. And the revolving door between Washington and Wall Street ensures that banks always have access to government decision makers. Our elected officials need to work for everyone, not just the wealthy and well-connected. And that means standing up to Wall Street and the big banks – 73 words.

g. _ [WEAKENING REGULATIONS]

Our economy is still recovering from a financial crisis that was caused by weakening regulations that had kept our economy safe for decades. Common sense regulation is needed to prevent banks from engaging in risky bets with our money and to protect consumers from the abuses and deceptive practices of credit card companies and payday lenders. When it comes to Wall Street, we can't have the fox watching the hen house. We need to put rules in place to prevent another crash – 82 words

13. Now I am going to read you a list of arguments Republicans running for Senate have made in opposition to enacting tougher reforms and restrictions on Wall Street. After listening to each, please tell me if it raises SERIOUS doubts, SOME doubts, MINOR doubts, or NO REAL DOUBTS about enacting tougher reforms and restrictions on Wall Street.

[REPEAT PROMPT IF NECESSARY] Does that raise SERIOUS doubts, SOME doubts, MINOR doubts, or NO REAL DOUBTS about enacting tougher reforms and restrictions on Wall Street?

- a. [REGULATORY AGENCIES DON'T WORK] “

More government bureaucracy isn't the solution. There were 26 regulatory agencies that were supposed to be overseeing and regulating the financial system, and predict the upcoming financial crisis — yet every one of these agencies missed it. Before adding more expensive and inefficient government agencies, we need to figure out why the ones we already have aren't doing their jobs. More government isn't the answer. 64 words

- b. [NANNY-STATE/NO CHOICES]

Regular people -- not Government bureaucrats -- should be able to decide what financial products and services are right for them. Instead the federal government is adopting new rules that limit consumer choices and restrict the flow of loans to small businesses that need funds to create jobs and expand their business. The government needs to stop interfering in our personal financial choices 62 words

c. _ [DODD-FRANK FAILED]

The Wall Street Reform Act of 2010 has been a failure. The big banks are bigger than ever and we've had the slowest economic recovery since the Great Depression. We don't need, burdensome new regulations that slow economic growth, and kill jobs. Instead let's reduce red tape and stop punishing the job creators and small businesses that drive our economy. That's what it takes to grow our economy.

15. Now I'm going to read you a pair of statements about a proposal to institute a small tax of a few cents per hundred dollars, on Wall Street financial transactions, including the purchase of derivatives, stocks, bonds, or other financial assets. This tax is sometimes referred to as a financial transactions tax.

For most Americans it's getting harder and harder to pay for college or save for retirement. But Wall Street profits are at record highs. A tiny tax on Wall Street transactions could raise billions of dollars to strengthen retirement security, create jobs, pay for college tuition for millions of families, or provide badly needed infrastructure improvements. Working families pay sales taxes on almost everything from a pair of shoes to a car -- shouldn't Wall Street traders pay sales taxes when they buy millions in stocks?

This tax may sound like a good idea, but it will only hurt people by passing on the costs on to everyone who invests in the market, including retirement accounts and 401Ks. This tax will hurt small investors, including seniors, and will make it harder for Americans to build up their pensions and mutual funds by charging people for every transaction, not just those done by Wall Street banks. This tax will lead to reduced job growth, inefficient markets, and less money in Americans' retirement savings. – 86 words

Sometimes over the course of a survey like this, people change their minds. Do you support or oppose instituting a small tax on certain Wall Street financial transactions, including the purchase of stocks, bonds, or other financial assets, or are you undecided?

[IF SUPPORT/OPPOSE] Would you say you support/oppose strongly or not so strongly
